Igor Malikov

Middle Frontend Developer & Freelancer

igor.sergeevich.814@gmail.com t.me/mea6ea6 github.com/Mea6ea6 Yerevan, Armenia

SUMMARY

Frontend developer with 4+ years of hands-on experience building landing pages, multi-page web applications, and polished UI interfaces — from quick client briefs to larger collaborative projects. Proficient in modern frontend stack with strong attention to detail, clean code structure, and a genuine care for the end result.

Comfortable working both independently as a freelancer and as part of a team — having co-founded and led frontend development in a startup environment. Adaptable and self-driven, with a strong belief that the best developers never stop learning. Eager to grow into new technologies, take on more complex challenges, and contribute meaningfully to projects that matter.

Currently based in Yerevan, Armenia. Open to remote work, freelance contracts, and full-time opportunities. Ready to dive into any direction the role requires and bring genuine enthusiasm to every step of the process.

EXPERIENCE

Freelance Frontend Developer

Self-employed · 2024 — Present · Remote

· Developing landing pages and multi-page websites for various clients across different industries
· Managing full project lifecycle independently — from requirements and design review to implementation and deployment
· Maintaining clean, well-structured codebases with a focus on performance and cross-browser compatibility
· Participating in occasional team collaborations, adapting quickly to existing workflows and codebases

Co-founder & Frontend Lead

Surge · 2023 — 2024 · Remote

· Co-founded a small development team and took full ownership of frontend architecture from day one
· Led end-to-end frontend development of a full-scale jewelry pawnshop platform — one of the most complex projects to date
· Initiated and executed a full codebase migration from vanilla JS to React, significantly improving scalability and maintainability
· Collaborated closely with designers and backend developers, contributing to product decisions beyond just UI implementation
· Gained hands-on experience navigating the challenges of an early-stage startup environment

Freelance Frontend Developer

Self-employed · 2021 — 2023

· Built 10+ landing pages for crypto, NFT, and commercial clients while simultaneously studying full-time
· Communicated with clients directly — gathering requirements, presenting results, and iterating based on feedback
· Delivered pixel-accurate implementations from Figma designs with attention to responsiveness and detail
· Developed a strong foundation in real-world project delivery under tight deadlines

SKILLS

Languages & Markup	HTML5, CSS3, JavaScript (ES6+), JSON

Frameworks & Libraries	React, Node.js, MongoDB (basics)
Tools & Platforms	Git, GitHub, Figma, VS Code, Vercel, Reg.ru
Practices	BEM methodology, responsive & adaptive design, cross-browser compatibility, semantic HTML, SEO basics, REST API integration
Soft Skills	Client communication, project self-management, fast onboarding to new codebases, eagerness to learn and adapt to new technologies and directions
